

ENVIRONMENTAL POLICY

TK Logistik organizes its transports and delivers our clients' goods with as few re-loads as possible and with the lowest possible environmental impact.

TK Logistik chooses its delivery partners, most of which are already certified as environmentally friendly, with great care and with the environment in mind.

We help protect the environment by

- We conduct regular reviews of our delivery partners in order to ensure that they meet our standards with regard to both the quality of work and its environmental impact.
- All of our vehicles operate solely on diesel of the environmentally friendly Mk 1 variety
- Carriers' retreaded tires may not contain HA-oils
- Through co-operation with a multitude of partners, we maximize the capacity of each vehicle, resulting in a lowering of total miles driven
- We are committed to waste sorting of paper, glass, metals, light bulbs, strip light bulbs, plastic, carton and burnable waste
- We refrain from using plastic utensils, glasses and similar
- We continuously engage in educational seminars and similar to remain up-to-date on environmentally friendly practices
- We provide a positive working environment for our personnel
- we comply with all legal requirements applicable to our industry

All of our co-workers, partners, and hired contractors participate in daily environment efforts.

We conduct regular reviews of our delivery partners in order to ensure that they meet our standards with regard to both the quality of work and its environmental impact

Our own efforts to decrease our negative impact on the environment are ceaselessly developed through constant improvements.

All of our co-workers are, in their daily work, responsible for ensuring that the environmental policy is adhered to.
